

# PLANT-BASED PHOSPHORUS

NUTRITIONAL  
SUPPLEMENT

## PRODUCT FEATURES

- This product constitutes a by-product derived from the production of corn-based ethanol. After undergoing several industrial processes, this product is obtained in the form of granular powder, which is then stored in silos prior to dispatch.
- This product is an organic supplement composed primarily of sources of protein, energy and minerals such as phosphorus and calcium.
- This product is made from vegetables (corn); therefore, its bioavailability is very close to 100%.

## PHYSICAL SPECIFICATIONS

**Appearance:** semi-fine granular powder  
**Color:** yellowish/cream  
**Humidity:** < 10%
